

ECONOMICS & POLICIES

**** The three policy areas selected are intended to be broad, overarching policies for the region. We commend our recommendations to the Country breakouts tomorrow**

ECONOMICS & POLICIES

1. Policies that support consumer education and other practices, including informative advertising and truthful labeling, that provide incentives for people to eat healthy diets.

ECONOMICS & POLICIES

2. Policies needed that protect food sovereignty, encourage local diets and reduce the concentration of economic power across the agricultural sector. Includes the

HONORABLE MENTIONS

- develop, support and use effective communications
- be wary of taxes & subsidies

ECONOMICS & POLICIES

3. Policies that support increases & routine augmentations of funding for agricultural research & development to improve production, distribution & education.
